

Dear FCC

In opposition to 04-160, where does the NAB get off trying to dictate what and who I listen to on radio, especially when I pay for it and they won't provide. I am very tired of their bias, liberal agenda's, so I turned them off and moved to satellite radio. This is nothing short of another liberal attempt to squash free enterprise because they are not willing to compete with such vital information and satellite radio does.
